It has been possible to largely preserve the uniform classicist design of an impressive four-sided courtyard in Chiemgau in its original form for about 130 years. Thanks to the stylish restoration, the impressive appearance of the monument is still preserved from the time of its construction. Today the courtyard is home to high-quality condominiums.

A total of 2,400 m² bright rolled RHEINZINK titanium zinc was used for the roof in a double standing seam covering on a back-ventilated formwork and the RHEINZINK AIR-Z structure mat.
